Who is Envision?

Envision provides academic programs in numerous categories, including STEM, medicine, law, government and leadership, business administration, entrepreneurialism, culinary arts, engineering, and aerospace. Programs are typically held during summer (May-August) in many cities across the United States as well as China, Australia, South Africa, and New Zealand.

Envision's programs are developed by educators and subject-matter professionals and are accredited by the International Association for Continuing Education and Training (IACET) and the Southern Association of Colleges and Schools Council on Accreditation and School Improvement (SACS CASI).

Using innovative tools and techniques, our activities mirror real-world challenges and facilitate critical thinking and communication among the groups. Envision advisors are trained teachers and subject-matter experts who love making a real impact—so much so that they come back year after year. To date, over 800,000 exceptional students have benefited from the transformational experiences Envision programs provide. Envision programs are innovative, safe, fun, empowering, and enable students to:

Discover Their Passion

Explore a Career

Realize Their Dreams

More information about Envision can be found at EnvisionExperience.com

What is Advanced Emergency Medicine?

The Advanced Emergency Medicine in collaboration with Stanford Medicine program provides an opportunity for high-achieving high school students with a passion for emergency medicine to receive a hands-on medical experience that will help fuel their goals of becoming future doctors and health care practitioners.

The program will be held on the campus of Stanford University. While at the program, students enjoy 10 days of hands-on emergency medicine training led by the staff of the Stanford University Department of Emergency Medicine, in a real-world medical environment. The students are able to truly step into the life of a medical practitioner through firsthand experience with life-saving ER medical procedures. During this time, students will have access to high-caliber facilities, labs, tools, and equipment, where they will practice performing clinical skills like triage, diagnosis, splinting, patient stabilization, toxicology assessment, and infectious disease management.

Why should I or my child attend this program?

It is no secret that the world is changing. Due to rapid advancements in technology and automation, the jobs of yesterday are no longer the jobs of today, and the jobs of today are unlikely to be the jobs of tomorrow.

We are already seeing the educational impact of this technological shift. While diplomas and degrees served their holders so well in the past, more and more they are being seen as insufficient by many employers. More than ever, it is essential that students gain tangible skills that set them apart from their peers; the kind of life-ready skills that can't be automated.

Founded on a 21st-century curriculum and learning techniques, Advanced Emergency Medicine provides students with hands-on learning opportunities that challenge them to think in new ways and helps them establish and grow essential skills that will allow them to succeed in our ever-evolving world, all in an engaging and exhilarating atmosphere.

"The program had a great positive impact on my daughter. She found the hands-on experiences (CPR, splinting, suturing...) most useful & informative."

- Melinda C, Mother of Advanced Emergency Medicine Alumna

"I think the anatomy program and the suturing program were two of my favorite activities. Seeing and experiencing what it was like to examine the human body and how it works was very cool, and the fact that I could handle seeing a dead body felt like the time most that I knew I could handle being a doctor. Also the suturing program got me interested in possibly being a surgeon."

- Kaitlyn P, Alumna of Advanced Emergency Medicine

How much does it cost to attend Advanced Emergency Medicine?

A number of factors determine the pricing of our programs, including location, length of program, and complexity of curriculum. For Advanced Emergency Medicine, tuition is \$6,295, and we have payment plans available. More information on the cost of attending the program can be found at EmgMedicine.com/info

To ensure that more students have the opportunity to attend our programs, Envision does offer a limited number of scholarships based on financial need, scholastic merit, and leadership achievement. Submission of a scholarship application is required to be considered for an award.
